The 2024 Alaska Innovators Hall of Fame

ability to build on knowledge by participating the ability to build on knowledge from other fields
to advance the knowledge of something has a very poor knowledge

Of his predecessor's work he built upon Collette's. The latter is long in all areas along

with her to look at Alaska because of the legacy of some really unbelievable

contribution of people but to highlight the single individual I'd call a researcher or I'd have to

say I'd be Alaska geologist Ken Bird

Collette recalls it's a kind of niche I came to the US Geological Service right after I left Alaska I

was only and Ken is really the person who taught me how to be a scientist and how to

advance in the responsibility of having a scientist participating in Alaska

Building an

In his role as a research leader, Bill Connor has developed his own innovation agenda and championed innovation in his research team. The fingerprint of his body of work will be carried through Alaska Infr
